## LearningSpace Enterprise Sole Source

Elevate Healthcare is the sole source manufacturer of the LearningSpace Enterprise center management system. LearningSpace Enterprise includes Elevate Healthcare's proprietary software and Elevate Healthcare is the sole provider of accompanying system hardware that is specially designed and customized to interface with the software and simulation equipment.

LearningSpace Enterprise includes the following modules: Recording, Video Review, Reports, Cases, Activities, Calendar, Resources, Inventory, Standardized Patient Administration, User Manager and System Manager.

Additionally, Elevate Healthcare is the sole provider of installation, training, and support and maintenance for LearningSpace Enterprise, and Elevate Healthcare is the only certified and authorized vendor to provide service and maintenance for LearningSpace.

This letter is valid for one year.

A handwritten signature in blue ink that reads "Grace Gagliano".

## LearningSpace Enterprise

The following are features and characteristics that are exclusive to LearningSpace Enterprise:

- Modular hardware configurations: LearningSpace One, LearningSpace Server Based
- HTML5, plug-in free software
- Built-in AI tools support faculty by offering suggested responses for observation checklists and SOAP notes scoring
- AI automatically maps transcript dialogue to checklist items to support suggested tailored responses (i.e. detecting student's patient greeting)
- Transcription feature, when enabled, automatically transcribes audio streams on recorded videos
- Resource/Inventory Management to track resources (rooms, simulators, personnel) by client and by quarter/semester/year
- Customizable reports to assess individual or group performance
- OSCE Management and SP Management
- Advanced scheduling to create time slots, rotations, stations, and SP/learner availability
- Industry leading latency of <1 sec on live broadcasts
- Simultaneous display of 9 video streams per room (any combination of cameras/monitors)
- Simultaneously view up to 30 live streams on center overview screen
- Integrate any patient simulator model to capture patient data in real time
- 12,000 hours of HD video storage per server
- Search videos by name, date, physiological data, and events
- Built-in intercom functionality
- Camera control (pan/tilt/zoom) available in single room view, multi-room view
- OSCE management and LDAP included, add-on purchase not required
- Virtual Room functionality to integrate teleconferencing platforms such as Zoom
- Extend software to remote sites without licensing fees
